

## *Technology, Safeguarding & Social Media Awareness Training*

The Netopian Technology, Safeguarding & Social Media Awareness Certificate demonstrate your commitment to keeping your children and young people safe online. .

### *Who should attend:*

Social Care Professionals and Foster Carers working with vulnerable children and young people; the safeguarding of children and young people is of vital importance in this world of ever advancing technologies in which children and young people are the digital explorers.

This training provides delegates with a greater understanding of the risks and hazards young people face in using technology and raise awareness of how to minimise these risks:

The following are examples of the key learning outcomes from the course

- Risks and hazards for young people and how to minimise these
- Educating young people and how we do this
- Predatrs and their methods and modes of operation
- Emerging issues and risks from new developing technologies
- The future of Social Media technologies and how this may develop in a social care setting

All training courses and presentations are tailored to the specific audience, in order to maximise the impact and effectiveness of delivery.
