

# Empowering Discovery and Promoting Protection

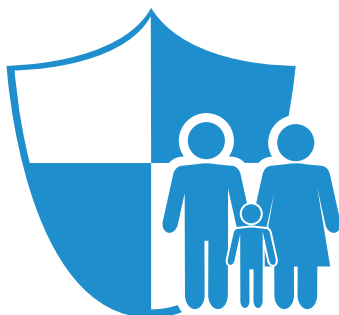

Netopian are recognised experts in the provision of e-safety, our unique Internet filtering and safeguarding solution protects vulnerable children from CSE, grooming and extremism.

We believe everybody has the responsibility to provide young people in their care with safe and secure internet access. With the ongoing expansion of the internet and rapid development of social media, we can monitor or restrict access to mitigate the potential risk of internet abuse, more especially but not exclusively for children and vulnerable adults.

The Netopian online safeguarding system picks up on risk taking behaviours by its users and identifies abuse, grooming and unwanted attention by others. Schools and Care homes are required by law to protect children and young people by:

- ✓ Providing a safe environment for children to learn
- ✓ Having systems and processes that ensure children are kept safe and allow for poor and unsafe practice to be challenged.
- ✓ Identifying instances in which there are grounds for concern about a child's welfare and initiating or
- ✓ taking appropriate action to keep them safe.

## Netopian Safeguarding Pro

We always make on-going improvements to our software, continuously monitoring any future potential risks to ensure our users are kept safe on the internet. However, our expert team of developers have over the last 12 months reviewed all aspects of our product to improve its speed, accuracy and to keep up with the ever-changing technology. We have improved all areas and added new features.

At Netopian we have millions of websites categorised based on key words which either allow or block a website. We know thousands of new sites appear online every day and it is impossible to categorise every single site which is where our Netopian Scanning Algorithm helps. Every website which is attempted to be accessed is analysed, if the content/request threshold is reached the page will be blocked. A request is sent to our support team to categorise the website into either a safe or blocked category.

# Netopian Safeguarding Pro

## Features, Benefits & Road Map

---

### Improved Features

- Internet Filtering by category
- Option to automatically block uncategorised sites

## Features, Benefits & Road Map

---

### Future Road Map

- Carer access to reporting suite
- Ability to set max daily online time
- Monitor Facebook comments/picture comments
- Alert on reaching maximum user count
- Compatibility on Kindle devices such as the Kindle Fire

### Key Benefits

- Alerts you to potential risk-taking behaviours
- Alerts you to risk-taking actions that could lead to a young person being groomed online
- Safe and secure internet access

### Internet Watch Foundation (IWF)

Netopian Limited is a member of the Internet Watch Foundation (IWF), a leading organisation for reporting and removing online child sexual abuse images and videos. Together we're making the internet a safer place.

Reporting to IWF makes a difference. It can lead to the removal of an image or video of children being sexually abused. It can help keep the public safe from stumbling on illegal images of child sexual abuse. It could even result in the rescue of a child from further abuse. Reports can be made anonymously.

Read more or report a website here: [www.iwf.org.uk](http://www.iwf.org.uk). Do the right thing.
